Zingerman's Job Questions

1. Do you have at least 1 year experience in web design?
   a. Yes

2. Rate your proficiency in HTML5 and CSS3
   a. Advanced

3. Rate your proficiency in Illustrator and/or Photoshop
   a. Intermediate

4. Which of the following do you have proficient experience working with (check all that apply)
   a. SASS/LESS
   b. GIT
   c. Twitter Bootstrap
   d. Javascript
   e. jQuery
   f. Sketch
   g. Slack
   h. Google Analytics
   i. Mac OS

5. List any other technologies or languages you are proficient in that you feel would be a valuable contribution to this position.
   a. Lightroom CC
   b. Node.js
   c. Express
   d. Bootstrap

6. Please provide any links for us to view your web design work.
   a. Personal Website → http://www-personal.umich.edu/~nealmatt/#portfolio
   b. GitHub → https://github.com/NealMatta/Michigan-Izzat-Website

7. What do you enjoy most about being a web designer?
   a. I enjoy the fact that every website I create will be different from the last. This simple fact alone allows me to constantly hone new skills, test my creativity, and learn new tools that I can apply to the next website I work on. I really enjoy the idea of applying everything I have learned regarding web design, while also really listening to and understanding the needs of who I am creating the website for. This creates a final product that is not only very much my own, but also caters to the unique, specific, and personal aspects of each website.

8. Why are you interested in this position?
   a. I am interested in this position because I want to polish my Front-end skills. Independently I have had a lot of practice and am confident in my abilities to create. However, I would love to interact with web developers who have been doing this for an extended period of time and can give me valuable insight on techniques I can use to better my work. I feel like u might wanna say something about why the company is cool or some shit but u don't have to

9. At the end of the internship, what skills or kind of experience would you like to come away with?
   a. I would ideally like to have more experience working as a web developer for non-tech companies in order to be a more versatile web designer, be more comfortable with Javascript, and ultimately, as I mentioned before, learn from and share ideas as much as I can with other developers.

10. When are you available to start working?
    a. I would be able to start working immediately. I am also extremely open to continue the internship into the school year. Because, I attend the University of Michigan, I could easily commute to and from Zingermans if necessary.
